***2021 new colors**

This Corian® Solid Surface paper palette is a flexible, handy and lightweight tool composed of high-definition printed paper samples which give a visual impression of what Corian® Solid Surface colors look like.

All printed colors were evaluated and compared to real Corian® Solid Surface samples under a 6000k lighting source.

This operation allowed the most accurate print match with the original material. The printed colors which present an accentuated metamerism, are mainly due to the mineral pigments contained in the inks.

Evaluation under different lighting conditions as well as differences in visual perception, could lead, for some colors, to appreciable differences between paper and material.

It is always advisable to evaluate the physical Corian® Solid Surface sample before making the final selection.

We invite you to visit www.corian.com, www.corian.com.br, www.corian.mx, check our online color tool or ask your Corian® Solid Surface sales contact for more information.

This list is valid from September 2021, until further notice.
